PROJECTS

Symptom Tracker | [Repo](#) | [Demo](#)

- Symptom Tracker is a full stack application that assists users by charting logged symptoms, compiling a general medical profile, and providing the option to print said elements.
- Created a user-friendly interface using CSS and Bootstrap and implemented Chart.js to provide users with a visual representation of symptom progression over time.
- React.js, Javascript, MongoDB, Mongoose, Express, Node.js, HTML, CSS

AvatarMatch | [Repo](#) | [Demo](#)

- avatarMatch is a concentration/memory matching game featuring the characters of a popular TV show.
- Engineered front-end Javascript and styled using CSS.
- Javascript, HTML, CSS

Hyprlft | [Repo](#) | [Demo](#)

- A landing page for a fictional company that offers fitness coaching services.
- Implemented modern CSS techniques & 7-1 SASS architecture to ensure code maintainability and reusability.
- HTML, CSS, SASS

EXPERIENCE

Rehabilitation Technician, Aide Manager
Back 2 Health Physical Therapy

2016 – 2019
Los Angeles, CA

- Educated patients on exercise technique and managed their expectations while training newer rehab aides.
- Ensured quality care and maximized patient gratification by communicating with therapists effectively.
- Promoted to aide manager and recognized by ownership for taking on a key role in consistently increasing the monthly averages of patients seen by 5%.
